1. Executive Summary

What We Built

A **self-service tax quote builder** that allows prospects to get instant price quotes for tax preparation services 24/7, directly from the Tavola Group website.

Key Benefits

Benefit	Impact
24/7 Lead Capture	Never miss a potential client
Instant Quotes	No waiting for callbacks
Automated Follow-up	Recover abandoned leads
CRM Integration	Seamless lead management
Rate Limiting	Prevent spam/abuse

Results

- Prospects can get quotes in under 5 minutes
- Leads captured even from incomplete submissions
- Automatic follow-up sequence for abandoned forms
- Direct sync to HubSpot CRM

2. Project Overview

The Problem

Tavola Group needed a way to:

- Provide instant tax quote estimates to website visitors
- Capture leads around the clock
- Follow up with prospects who don't complete the form
- Reduce manual work for the team

The Solution

A WordPress plugin with:

5-Step Wizard

Guided questionnaire with real-time preview

Price Calculation

Instant quotes based on services selected

Email Automation

Follow-up sequence for abandoned leads

HubSpot CRM

Automatic contact and deal creation

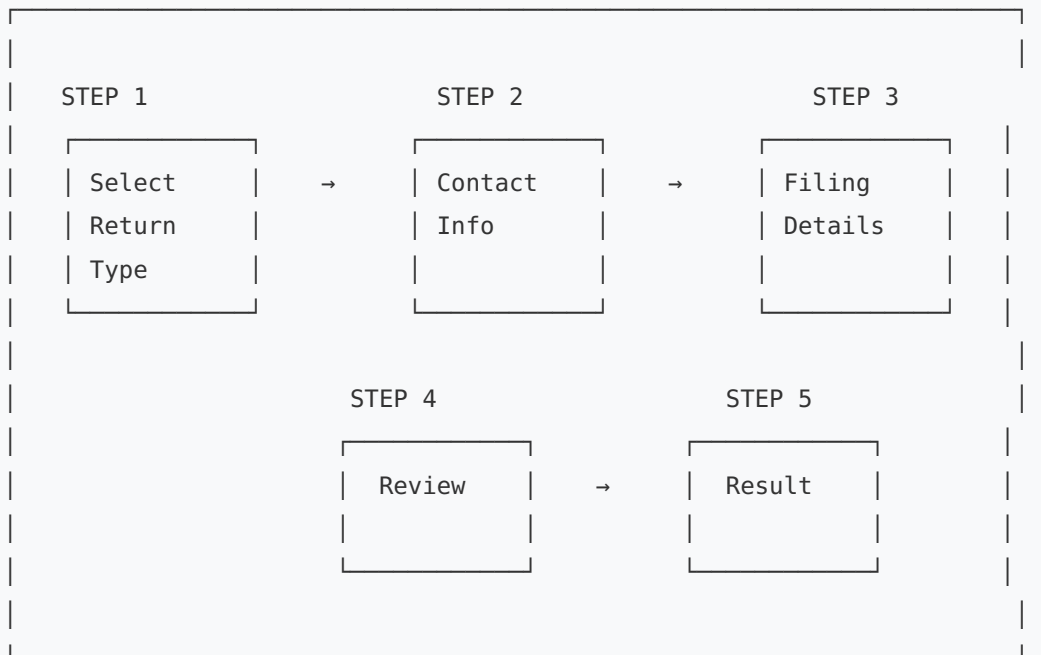

System Requirements

Component	Technology
Platform	WordPress

Component	Technology
Shortcode	[tavola_quote_builder]
Database	Custom tables (no wp_posts)
Emails	wp_mail() compatible
CRM	HubSpot Private App

3. How It Works

The 5-Step Wizard

Step Details

Step 1: Return Type Selection

- Individual tax return
- Business tax return (C-Corp, S-Corp, Partnership)
- Can select both for combined quote

Step 2: Contact Information

- Name, Email, Phone

- Data saved as "in_progress" partial

Step 3: Filing Details

- Dynamic questions based on selected type
- Real-time price preview

Step 4: Review

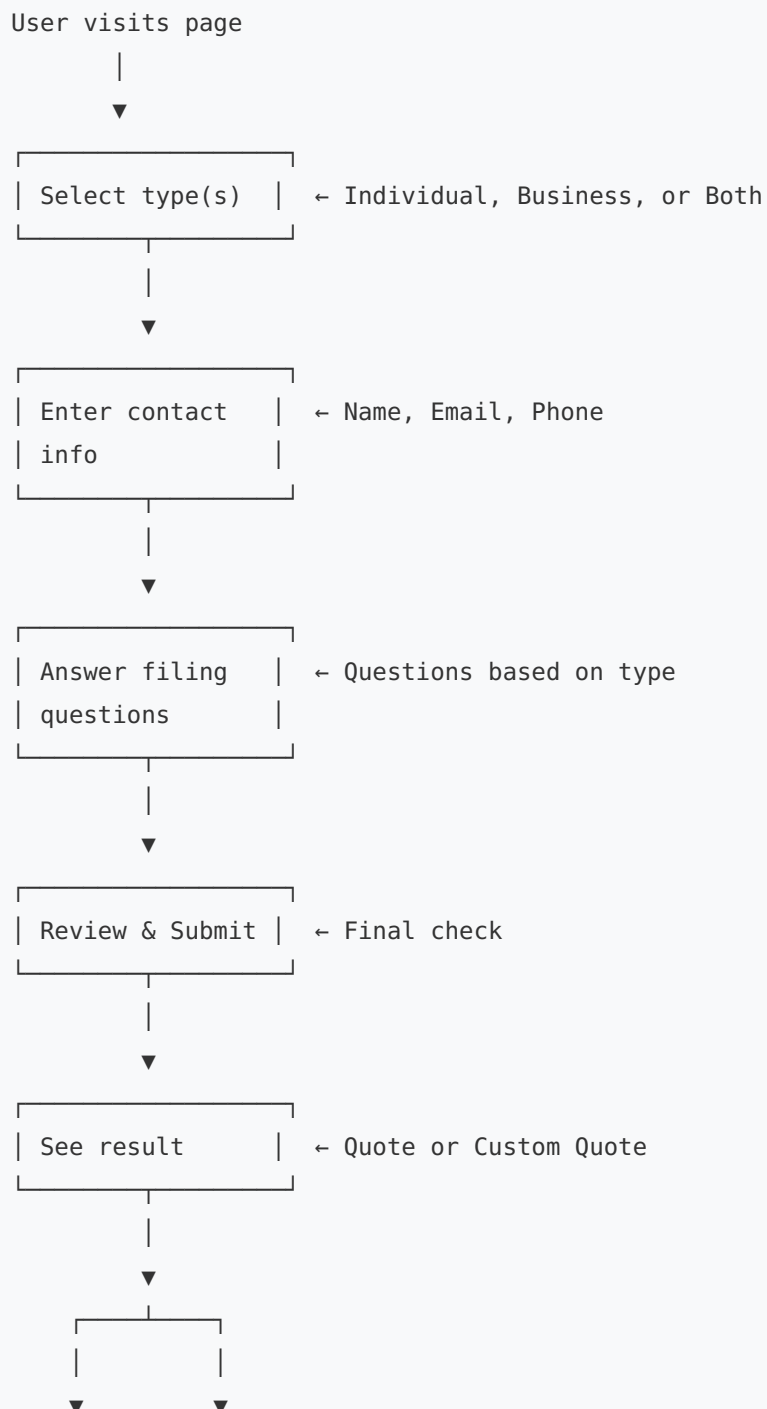

- Summary of all answers
- Final price estimate
- Edit capability

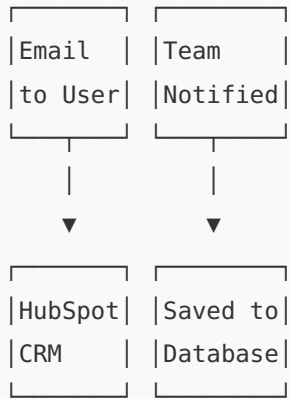

Step 5: Result

- Calculated quote or "Custom Quote Required"
- Email confirmation sent
- Option to schedule a call

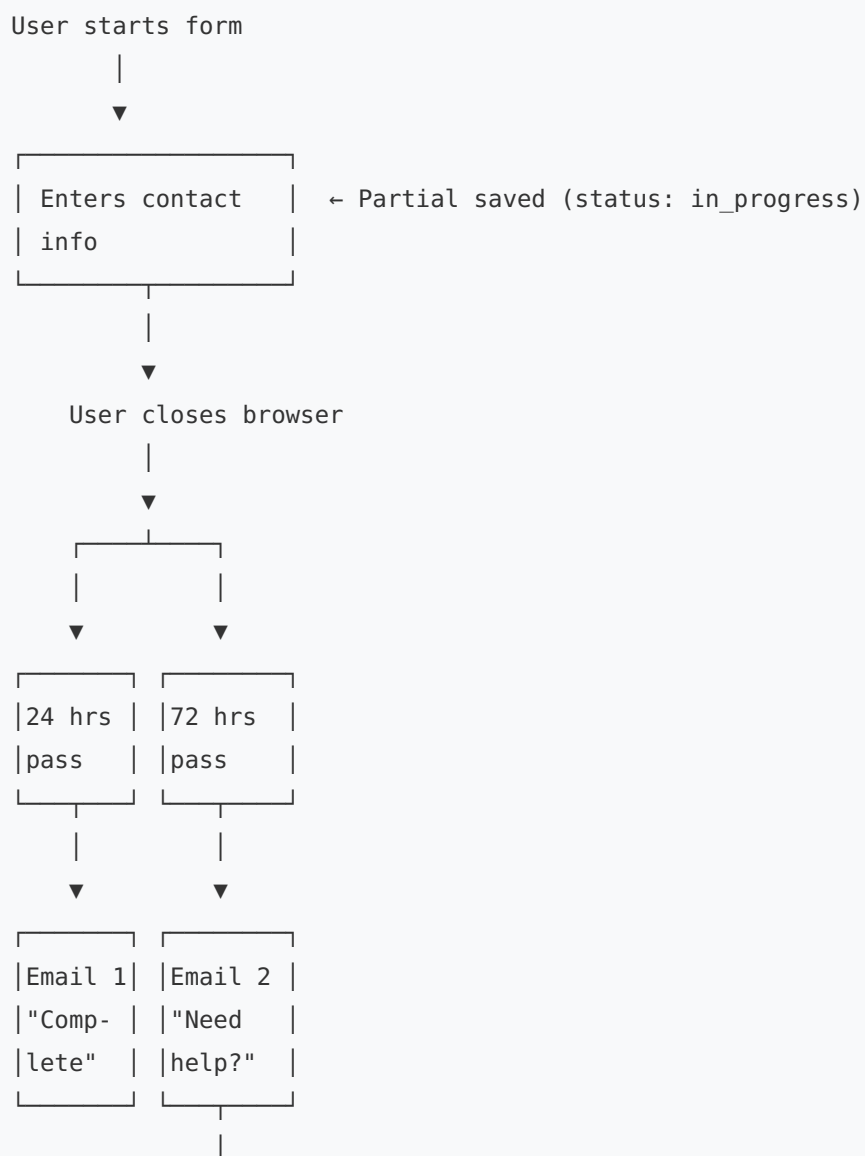

4. User Journey

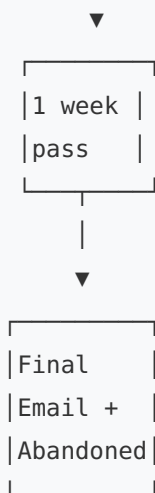

Happy Path: Complete Submission

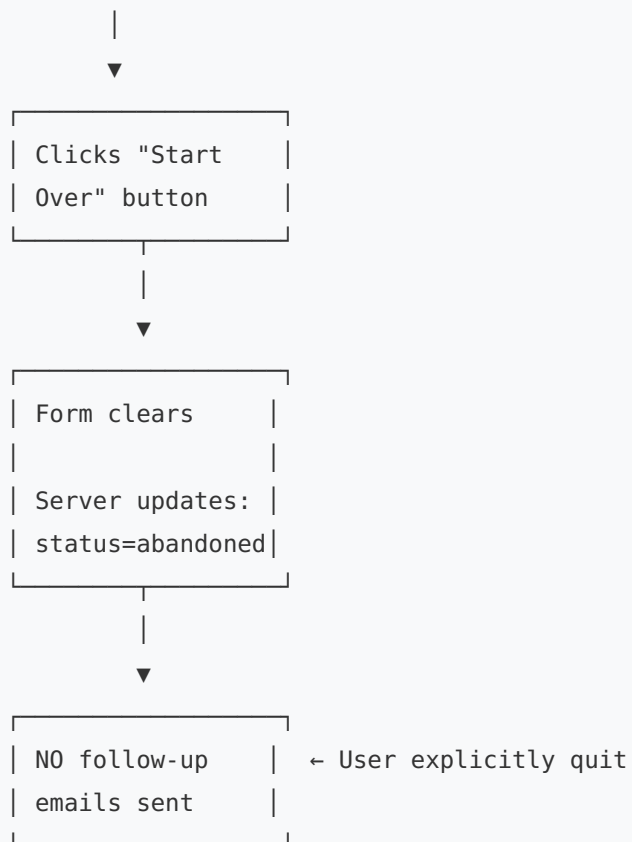

Alternative Path: Incomplete Submission

Path: User Clicks "Start Over"

User has partial submission (in_progress)

5. Admin Features

Dashboard Access

1. Log into WordPress admin
2. Click "**Quote Builder**" in left menu
3. View submissions, settings, and pricing

Tabs Available

Tab	Purpose
Submissions	View all quotes, filter by status
Individual	Configure Individual pricing
Business	Configure Business pricing
Settings	General plugin settings

Submissions Tab

- View all quote requests
- Filter by: All, Completed, In Progress, Abandoned
- Search by name or email
- Export to CSV
- View individual submission details

Pricing Tabs

Individual:

- Add/edit/remove line items

- Set fees per service
- Configure pricing patterns (flat, per-unit, etc.)
- Add help text for questions
- Reorder items

Business:

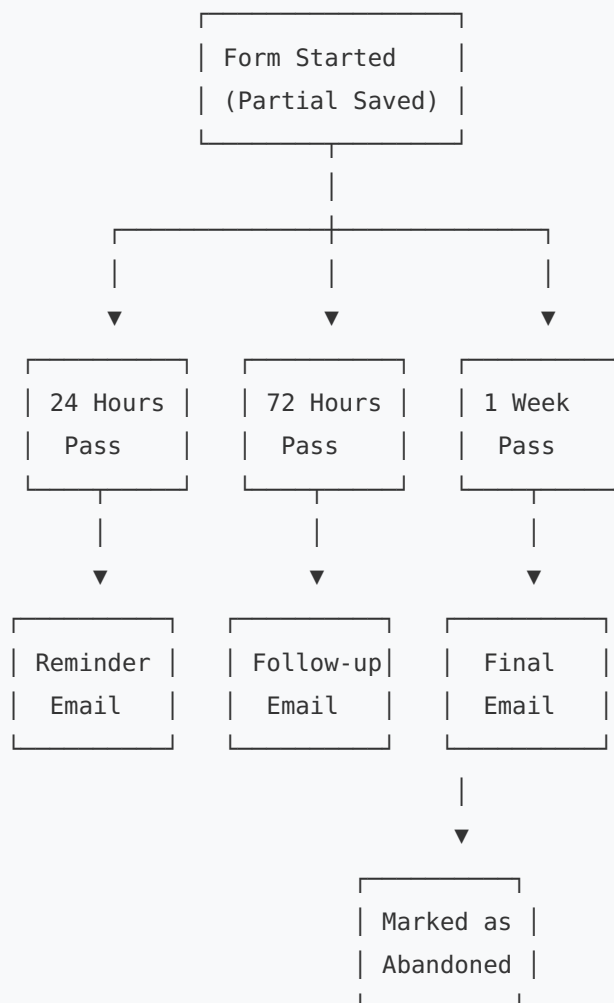

- Configure entity types
- Set asset band pricing
- Configure extra service fees
- Set revenue thresholds

Settings Tab

Setting	Description
Disclaimer Text	Shown below quote result
Scheduling Link	Calendly/booking URL
Team Email	Where notifications go
Enable Follow-up	Toggle abandoned emails
Follow-up Timing	When to send reminders
HubSpot API	CRM connection

6. Email Automation

Email Flow Diagram

Email Types

#	Email	Recipient	When
1	Confirmation	Customer	After submit
2	Team Notification	Team	After submit
3	Reminder	Customer	24h after partial
4	Follow-up	Customer	72h after partial
5	Final	Customer	1 week after partial

Email Templates

Confirmation Email (to Customer)

Subject: We received your quote request — Tavola Group

Hi [Name],

Thanks for reaching out. We've received your information and generated an estimated quote for you.

Someone from our team will be reaching out shortly to discuss next steps.

If you have any questions, feel free to reply.

Best,
Tavola Group

Team Notification Email

Subject: New [Type] Quote Submission — [Name]

New quote submission received.

Type: [Individual/Business]

Name: [Name]

Email: [Email]

Phone: [Phone]

Quote: \$[Amount]

Email Settings

Setting	Default	Description
Enable Follow-up	Yes	Send automated follow-ups
Reminder Timing	24 hours	When to send first reminder
Follow-up Timing	72 hours	When to send follow-up
Final Reminder	1 week	When to send final email
Team Email	(Admin email)	Where to send notifications

7. HubSpot Integration

What Gets Created

When a quote is submitted, the following is automatically created in HubSpot:

Contact

HubSpot Field	Source
Email	contact_email
First Name	contact_name (first word)
Last Name	contact_name (remaining words)
Phone	contact_phone

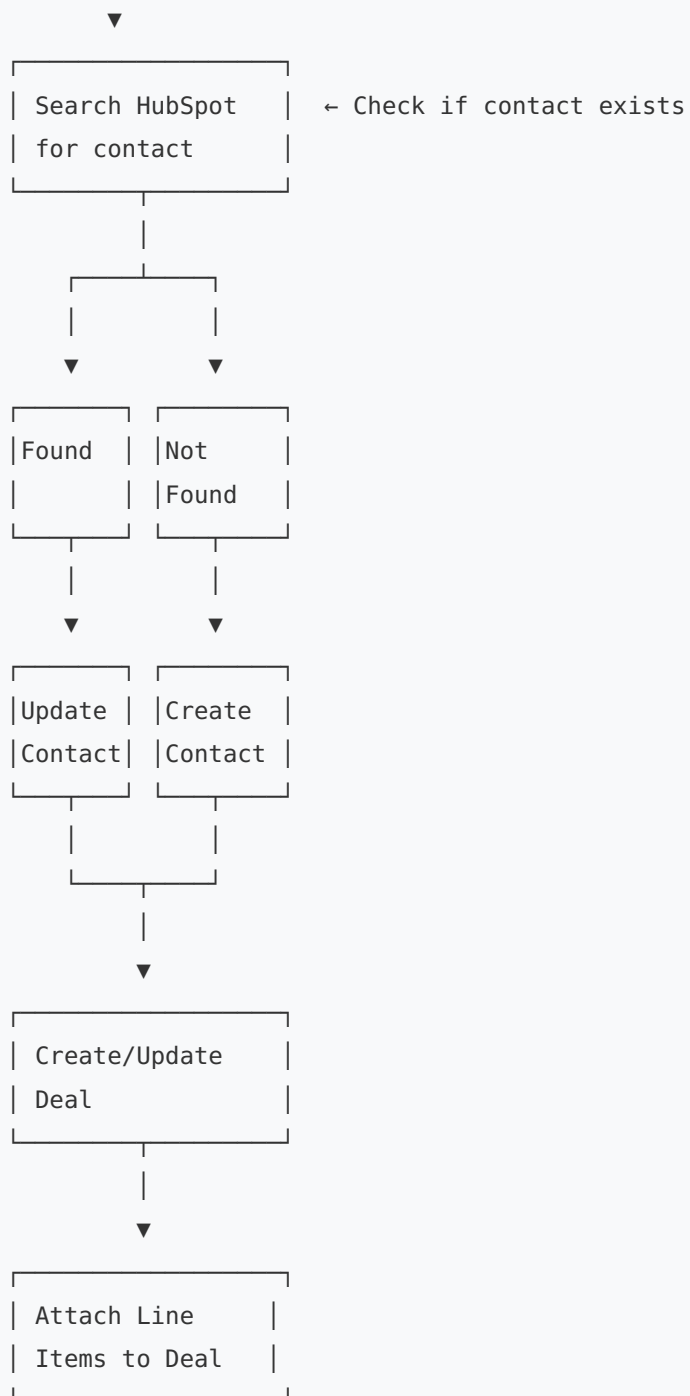

Deal

HubSpot Field	Source
Deal Name	"[Type] Quote - [Name]"
Amount	calculated_total
Deal Stage	Appointment Scheduled
Pipeline	Default

Sync Flow

Form Submitted

|

Requirements

- HubSpot Private App Token
- API access enabled
- Token stored in plugin settings

8. Pricing Logic

Individual Return Pricing

Formula

Total = Base Fee + Σ (Line Items)

Base Fee

Item	Fee
W-2 wages	\$350 (always applies)

Line Item Patterns

Pattern	How It Works	Example
Per Unit	Qty × Fee	Rental: \$200 × 2 = \$400
Flat	Fixed fee, qty ignored	1099-INT: \$25
Hardcoded	Specific amount	1099-R: \$100
Custom	Requires manual quote	Crypto over \$100K

Individual Services & Fees

Service	Fee	Pattern
Multiple states	\$150	Per state
1099-INT/DIV	\$25	Flat

Service	Fee	Pattern
1099-B (Brokerage)	\$25	Per sale
Rental property	\$200	Per property
Self-employed	\$200	Flat
Farm income	\$275	Flat
K-1 received	\$50	Per K-1
HSA	\$25	Flat
Home sale (1099-S)	\$150	Flat
1099-R (Retirement)	\$100	Hardcoded
Crypto > \$100K	Custom	N/A
Foreign accounts (FBAR)	Custom	N/A

Business Return Pricing

Formula

$$\text{Total} = \text{Base Fee (Part A)} + \text{Extras (Part B)}$$

Part A: Base Fee Calculation

Step 1: Check Asset Level

- └─ \$5M-\$10M → Custom Quote
- └─ Over \$10M → Custom Quote

Step 2: Check Schedule L Requirement

- └─ If NOT required → \$999 flat
- └─ If required → Go to Step 3

Step 3: Calculate from Asset Band + Revenue

- └─ Base Price + Revenue Add-on (if >\$1M)

Asset Band Pricing

Asset Level	C-Corp/S-Corp	Partnership
Under \$250K	\$1,250	\$1,250
\$250K-\$500K	\$1,250	\$1,250
\$500K-\$1M	\$1,500	\$1,250
\$1M-\$2M	\$1,500	\$1,500
\$2M-\$5M	\$1,750	\$1,700
\$5M+	Custom	Custom

Revenue Add-on

Revenue	Add-on
Under \$250K	+\$0
\$250K-\$1M	+\$0
Over \$1M	+\$200

Part B: Extra Services

Service	Fee
Multiple partners (extra K-1s)	\$25 each
Multiple states	\$250 each
Fixed asset schedule	\$250
Foreign partner	\$350
Books don't match tax	\$250

Custom Quote Triggers

Certain situations require a custom quote instead of an auto-calculated price:

Trigger	Type	Reason
Assets \$5M-\$10M	Business	Complex compliance
Assets Over \$10M	Business	High complexity
Crypto volume > \$100K	Individual	Requires review
Foreign accounts (FBAR)	Individual	Special reporting
Multiple businesses	Combined	Per-client assessment

9. Technical Architecture

File Structure

```
tavola-quote-builder/  
├─ tavola-quote-builder.php      # Main plugin file

```

Database Tables

wp_tqb_submissions

Main table for all quote submissions.

Column	Type	Description
id	BIGINT	Primary key

Column	Type	Description
quote_type	VARCHAR	individual/business/combined
contact_name	VARCHAR	Customer name
contact_email	VARCHAR	Customer email
contact_phone	VARCHAR	Customer phone
answers	LONGTEXT	JSON of all answers
calculated_total	DECIMAL	Final price
is_custom_quote	TINYINT	1 if custom
status	VARCHAR	in_progress/completed/abandoned
user_ip	VARCHAR	Visitor IP
created_at	DATETIME	Creation time
updated_at	DATETIME	Last update

wp_tqb_line_items

Pricing configuration for services.

Column	Type	Description
item_key	VARCHAR	Unique identifier
item_label	VARCHAR	Display name
fee	DECIMAL	Price
pricing_pattern	VARCHAR	qty_times_fee/flat/hardcoded
is_custom_quote_trigger	TINYINT	Always triggers custom

wp_tqb_asset_bands

Business asset band pricing.

Column	Type	Description
entity_type	VARCHAR	c_s_corp/partnership
band_label	VARCHAR	Display label
base_price	DECIMAL	Price for band

AJAX API

Action	Purpose
tqb_save_partial	Save progress
tqb_submit_quote	Final submission
tqb_check_partial_by_ip	Check existing partial
tqb_dismiss_partial	Mark as abandoned

10. Security Measures

Protection Layers

Layer	Implementation
CSRF Protection	WordPress nonces on all AJAX
Input Sanitization	<code>sanitize_text_field()</code> , <code>esc_html()</code>
SQL Injection	<code>\$wpdb->prepare()</code> for all queries
XSS Prevention	Output escaping on all displays
Rate Limiting	Max 5/IP per 24 hours
Contact Verification	Must match for partial updates

Rate Limiting

Request received

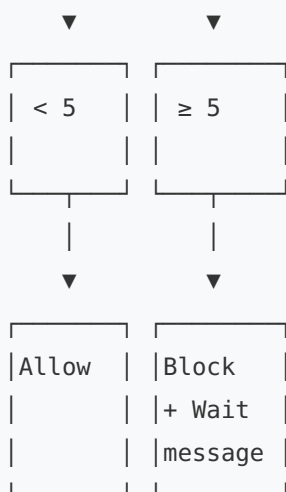

Get user IP

Count submissions
in last 24 hours

Rate Limit Configuration

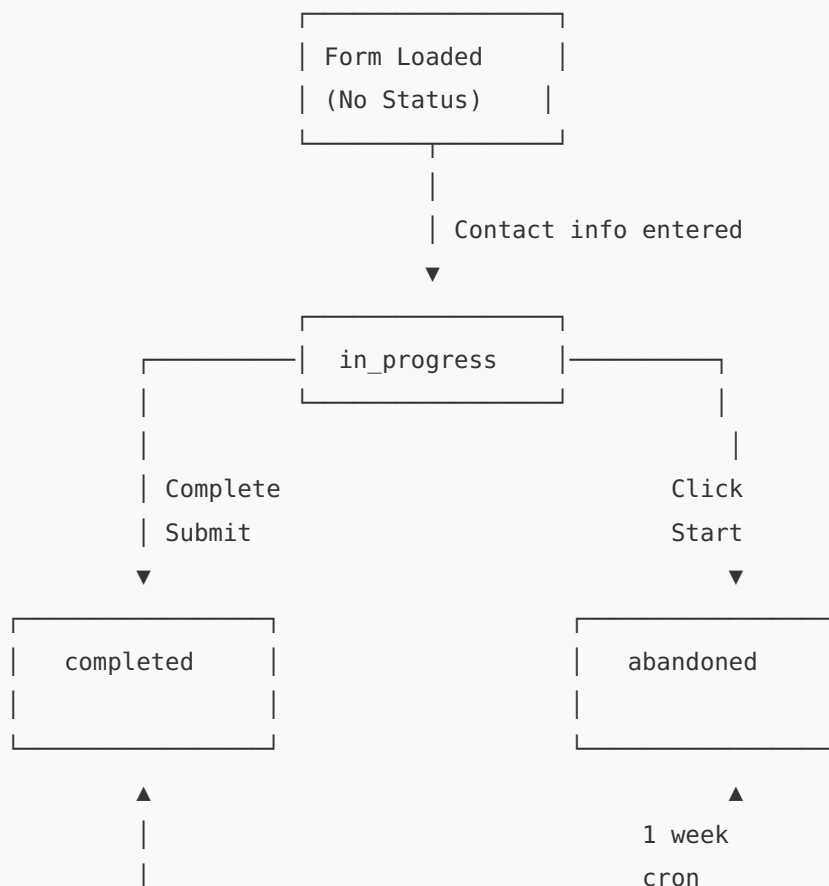

Setting	Value
Max Submissions per IP	5
Time Window	24 hours
Cooldown after Limit	30 minutes

11. Status Management

Submission Statuses

Status	Meaning	Follow-up Emails
in_progress	Started but not finished	Yes
completed	Successfully submitted	No
abandoned	User quit or clicked Start Over	No

Status Transitions

(auto-abandoned if still in_progress)

Abandoned Record Protection

Once a record is marked **abandoned**:

- Cannot be updated accidentally
- Excluded from IP conflict checks
- No follow-up emails sent
- Preserved for reporting purposes

12. Configuration Guide

Initial Setup

1. **Install Plugin** via WordPress admin
2. **Add to Page:** Place `[tavola_quote_builder]` on desired page
3. **Configure Settings:** Go to Quote Builder → Settings

Settings Explained

Setting	Location	Notes
Disclaimer Text	Settings Tab	Shown below result
Scheduling Link	Settings Tab	Calendly URL for booking
Team Email	Settings Tab	Notification destination
Enable Follow-up	Settings Tab	Toggle abandoned emails
HubSpot Token	Settings Tab	Private App Token

Pricing Configuration

Individual Tab:

- View all service items
- Edit fees and labels
- Add help text
- Enable/disable items

Business Tab:

- Configure entity types

- Set asset band prices
- Define extra services

13. FAQ

For Clients

Q: How long does it take to get a quote?

A: Under 5 minutes for most users.

Q: What if my situation is complicated?

A: If you need a custom quote, you'll be directed to schedule a call.

Q: What happens if I don't finish the form?

A: You'll receive reminder emails unless you click "Start Over."

Q: Can I quote both personal and business taxes?

A: Yes, you can select both and get a combined quote.

For Developers

Q: How do I add a new Individual service?

A: Go to Quote Builder → Individual Tab → Add New Item.

Q: How do I change the HubSpot pipeline?

A: Update in HubSpot settings; deal creation code is in class-tqb-hubspot.php.

Q: Where are the email templates?

A: In class-tqb-email.php as static methods.

Q: How do I test locally?

A: Use XAMPP/MAMP; IP will show as 127.0.0.1 or ::1.

Summary

Capabilities Implemented

Capability	Status
5-step guided questionnaire	Complete
Real-time price calculation	Complete
Individual & Business support	Complete
Admin dashboard	Complete
Email notifications	Complete
HubSpot integration	Complete
Abandoned lead follow-up	Complete
Rate limiting	Complete
Status management	Complete

Key Files

File	Purpose
class-tqb-pricing-engine.php	Price calculation logic
class-tqb-quote-handler.php	Submission processing
class-tqb-email.php	Email sending
class-tqb-hubspot.php	CRM integration

File	Purpose
tqb-public.js	Frontend form logic

Ready for Production

The Tavola Quote Builder is fully implemented and ready for deployment. All features are tested, documented, and production-ready.
